

# LEARNING SUPPORT

**Inclusion is a very important part of Applemore College and therefore meeting the needs of students with additional educational needs is a high priority. We have a team of experienced learning support assistants and higher level teaching assistants who provide in class support and also out of class interventions. Teachers have received training in order to be as proactive as possible to provide the best support for your child in the classroom. In addition, reasonable adjustments are made in order to make Applemore accessible and ambitious for all students.**

**Also, we have a County funded SpLD resource provision for students with education, health and care plans. It is a fully integrated part of the college where guidance and support is given to our dyslexic students, enabling them to become independent and confident learners. We strongly believe that dyslexia is NOT a barrier to learning and we strive to support our students in discovering the best way for them, as an individual, to move forward with a variety of strategies, methods and understanding.**

**Our school is accredited with the 'Dyslexia Friendly Schools' award and this reflects the excellent Quality First teaching from staff.**

**Your child is at the centre of what we do. Much time and care is offered to not only support learning, but to encourage self-belief and a desire to reach as high as they can dream. We truly believe that our role is to provide the foundation from which each child can confidently launch in to life after Applemore College, taking a variety of strategies, skills and their brilliant minds with them.**
